

MUHAMMAD DUSTIN

Full Stack & Systems Development

mhammaddustin@gmail.com | Bandung, Indonesia [linkedin.com/in/muhammad-dustin](https://www.linkedin.com/in/muhammad-dustin) | portofoliomugiwara.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer and IT Technician with strong systems-oriented engineering experience spanning enterprise software, network infrastructure (CCNA-certified), IoT/embedded systems, and workflow automation. Proven track record identifying inefficiencies in enterprise operations and building software systems to solve them, in large-scale environments (PT. KCIC, PT. Nutech Integrasi), with direct responsibility for system uptime, integration, and cross-functional technical support. Skilled at bridging software, hardware, and network layers to design reliable, maintainable solutions — well suited to system engineering roles requiring both development depth and infrastructure understanding.

TECHNICAL SKILLS

- Systems & Networking: CCNA (Enterprise Networking, Security & Automation), Linux (Ubuntu), Windows, IoT Embedded Systems, Networking Fundamentals
- Backend & Databases: Node.js, PHP (Native & Inertia.js), REST API design, PostgreSQL, MySQL, MongoDB
- Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
- Automation & Tools: n8n Workflow Automation, WAHA, Git, GitHub, Postman, Vercel
- Engineering Practices: System integration, issue diagnosis & resolution, uptime monitoring, client/stakeholder communication, documentation

WORK EXPERIENCE

IT Technician — PT. Nutech Integrasi, Jakarta, Indonesia

May 2025 – Present

- Identified recurring inefficiencies in departmental work documentation and reporting processes at PT. Kereta Cepat Indonesia China (KCIC), and took the initiative to design and build digital systems to replace them.
- Built and deployed [kcic.online](#) and [cms.kcic.online](#) — a departmental profile web portal and content management system for the HPIO division — using React.js with a custom-built REST API backend.
- Engineered a WhatsApp Bot integrated with AI automation (WAHA + n8n) to automatically capture and log IT device damage reports from group messages, eliminating manual data entry and improving incident response time for KCIC operations.
- Collaborated with KCIC interns and cross-functional teams to design, iterate, and deploy both projects within tight deadlines.
- Maintained application uptime and performed root-cause issue analysis to ensure 99% system availability across deployed services.

Web Developer (Internship) — PT. Kereta Cepat Indonesia China (KCIC), Jakarta, Indonesia

Sep 2024 – May 2025

- Designed and built a full IT Maintenance Report system from scratch using native JavaScript and PHP — replacing manual spreadsheets, improving recording efficiency by 75% and reducing reporting errors by ~60%.
- Architected the application to track device issues, maintenance history, and resolution status across 40+ operational devices, enabling data-driven decisions for the IT team.
- Built responsive interfaces with HTML, CSS, and JavaScript that improved data input efficiency and increased user task completion speed by 30%.
- Managed IT ticketing workflows and issue tracking in parallel, ensuring 20+ devices remained operational throughout the internship.

Freelance Full Stack Developer — Self-Employed, Indonesia

Jun 2024

- Developed [varnellcollection.com](#), a production e-commerce platform for a Bandung shoe brand using PHP with Inertia.js and React.js frontend, backed by MySQL — featuring product catalog, cart, and admin inventory management.
- Built [mindsetngedit.com](#), a digital editing services platform for IPB University students using React.js and Node.js, with a full admin dashboard supporting 10+ news articles and digital product listings.
- Implemented role-based access control and CRUD admin panels managing 13+ content types across client projects.
- Delivered reusable, responsive UI components across 3+ applications, improving consistency and cutting future development time.

KEY PROJECTS

kcic.online & cms.kcic.online | Stack: React.js, REST API, Custom CMS

- Departmental profile portal and CMS for the HPIO division at PT. KCIC — built and deployed during tenure at PT. Nutech Integrasi as vendor.

WhatsApp Bot with AI Integration | Stack: WAHA, n8n, AI Automation

- Automated bot that listens to WA group messages and records IT device damage reports without manual input, built in collaboration with KCIC interns.

IT Maintenance Report Web App | Stack: JavaScript (Native), PHP (Native)

- Internal system for PT. KCIC IT team to digitally track device issues and maintenance history — reduced recording time by 75% and errors by 60%.

varnellcollection.com | Stack: PHP, Inertia.js, React.js, MySQL

- E-commerce platform for a Bandung-based shoe brand, including product catalog, shopping cart, checkout flow, and admin inventory management.

mindsetngedit.com | Stack: React.js, Node.js, MySQL

- Service platform for digital editing services targeting IPB University students, featuring service listings, booking system, and admin content management.

EDUCATION

Bachelor's Degree – Computer Science — Binus University, Indonesia

Nov 2025 – Expected Nov 2027

- Current GPA: 3.91
- Reached the final phase of a business proposal competition on Green Innovation.
- Participated in the LIDM (Lomba Inovasi Digital Mahasiswa) poster competition.

Associate Degree – Computer Engineering — Universitas Telkom, Bandung, Indonesia

Sep 2022 – Aug 2025

- GPA: 3.89 / 4.00 — Top 15% in relevant coursework: Web Development, IoT Embedded Systems, Networking.
- Selected as one of 20 recipients of the International Student Mobility Awards (IISMA) — awarded for academic excellence and outstanding potential.
- Head of Communication & Information Division (KOMINFO), HIMATEK — led a 5-member team managing media and communication for 8 organizational events.

CERTIFICATIONS

- Google IT Support Professional Certificate – Coursera
- CCNAv7: Enterprise Networking, Security, and Automation – Cisco
- Basic Project Management – Dicoding
- Introduction to Artificial Intelligence – Dicoding
- JavaScript Fundamentals – Dicoding
- Web Development for Beginners – Dicoding
